Frontend Engineer (React) | Full Stack Background

Frontend-focused engineer with experience building production web applications using React, TypeScript, and modern frontend architectures. Background in full stack development with Java/Spring Boot and microservices.

Experience working on real-world systems involving APIs, data flows, and operational interfaces. Strong focus on usability, performance, and scalable frontend architecture.

Experience

Frontend Engineer (Contract)

2026 - Present

- Building and maintaining frontend applications using React and TypeScript
- Developing reusable components and improving UI consistency across projects
- Integrating REST APIs and handling asynchronous data flows
- Collaborating with backend teams to define API contracts and improve data handling
- Improving performance and responsiveness of web applications

Software Developer (Trainee)

2024 - 2026

- Developed and maintained microservices using Java and Spring Boot
- Integrated systems and improved backend communication between services
- Worked on frontend features using Angular, supporting full stack development

Skills

Frontend:
React, TypeScript, JavaScript (ES6+), HTML, CSS

Backend:
Java, Spring Boot, REST APIs

Tools & Concepts:
Git, Docker, Microservices, Clean Architecture, Agile (Scrum)

Education

Bachelor's Degree in Software Engineering
Pontifical Catholic University of Paraná (PUC-PR)
Completed: 2025

Languages

Portuguese: Native
English: Basic (A2 – actively improving)
